

VISSER single belt ETV

The VISSER single belt type ETV is designed for high-capacity product transport. Its product- and user-friendly design ensures ease of use and convenience. VISSER equips the ETV with a solid rubber belt and a front scraper as standard.

The belt has a troughed shape with moving sides that prevent product damage.

The moving sides ensure high capacity and will also allow you to read your product from the belt.

The VISSER single belt ETV is available in widths of 70 and 80 cm.

Thanks to the numerous options, the belt can be fully customized to your specific requirements.

Optional: heavy duty frame with hydraulic pump

Control box

Optional: Visser Line Control

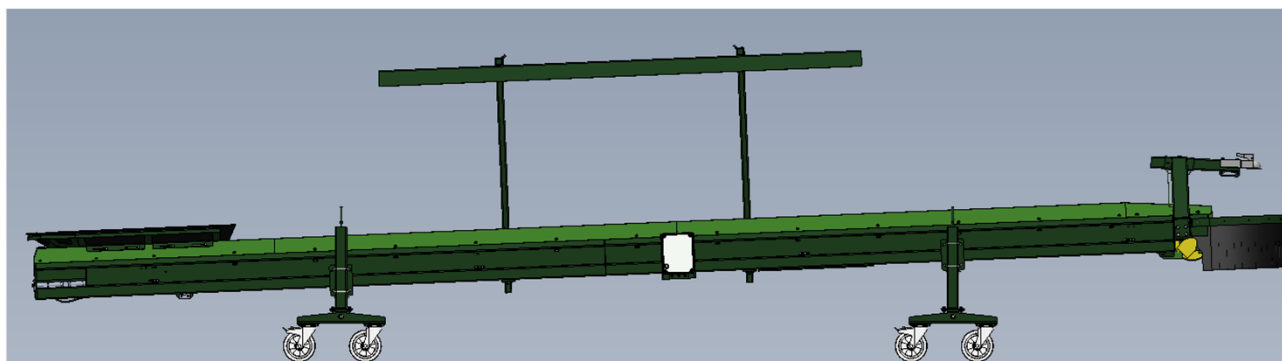

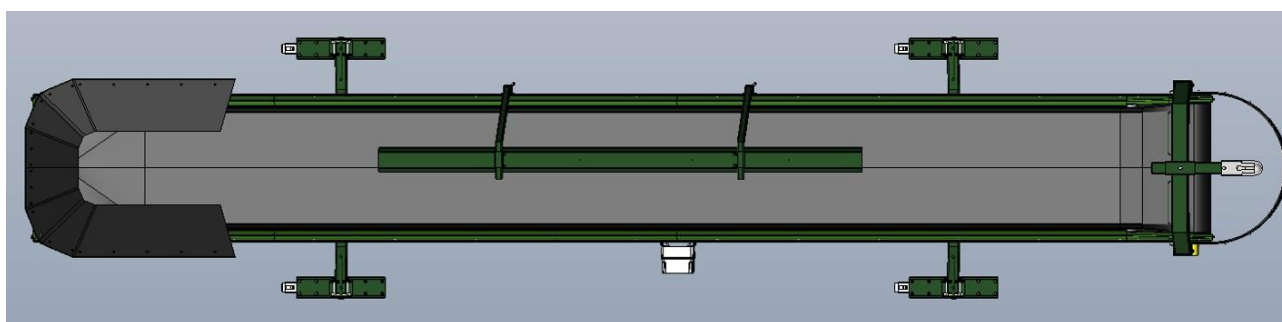

Optional: drawbar
